EDUCATION

University of Birmingham

Master of Engineering, Computer Science & Software Engineering

Dubai, UAE

Aug. 2023 – May 2027

EXPERIENCE

Paedia Consultancy

Jan 2026 – June 2026

Software Developer & Data Analyst

[Your City/Remote]

- Designed and architected the **database schema** for the company's web platform, structuring data models to support student inquiry and application analytics using **React** and **Supabase**
- Analyzed study-abroad consulting business requirements and translated them into structured **data models** and reporting-ready **UI components**, supporting data-driven decision-making for consultancy leadership

MediClinic

Sep. 2025 – December 2025

Freelance Frontend Developer

Dubai(Remote), UAE

- Built full-featured web application in **React** and **TypeScript** interfacing with Flask backend for hospital IR department with patient creation, procedure management, and dynamic checklist attachment system for **15+ clinical checkpoints**
- Developed dynamic checklist system for pre-procedural planning, sign-in, and sign-out workflows, **reducing manual coordination by 40 hours/week**

GMN AI Agents

Oct. 2024 – Feb 2025

Software Engineer Intern

Dubai(Remote), UAE

- Trained NLP model using **TensorFlow** and **BERT embeddings** for resume parsing, achieving **92% accuracy** in skill extraction from unstructured CV data
- Created **50+ test cases** covering CV upload, parsing, and recommendation flows with automated validation scripts, improving parsing accuracy by **15-20%** across **30+ formats**

PROJECTS

Productive | Microsoft/ASUS Bounty | *React, TypeScript, Python, Flask, Azure OpenAI, Microsoft Graph API*

- Placed 2nd among **600+ participants** from **30+ universities** at ASUS Copilot Challenge 2026 building AI-powered student productivity platform
- Engineered deep **Microsoft ecosystem integration** using **OAuth 2.0 with MSAL**, connecting **Teams, Outlook Calendar, To Do, and OneNote**
- Developed **professor dashboard** with course management tools, student engagement tracking, and **AI-powered quiz generation** capabilities

CarboTrack | Odoo Hackathon | *Odoo, Python, External APIs, PostgreSQL*

- Won **4th place** among **500+ participants** and gained company recognition from **Odoo** building carbon tracking module in **48-hour sprint** with event-based emissions logging across departments
- Integrated **Electricity Maps API** for emission data and **embedded LLM model** generating AI-powered carbon reduction tips based on usage patterns

ImageLab | Google Summer of Code 2026 - C2SI | *React, TypeScript, Python, FastAPI, OpenCV, Blockly*

- Contributing to open-source educational image processing platform as part of **GSoC 2026 application** with C2SI organization
- Implemented **5+ operators** (Gaussian Noise, Salt & Pepper Noise, Sepia Filter, Canny Edge Detection) with full **React/TypeScript** frontend and **FastAPI/OpenCV** backend integration
- Built real-time sidebar search with auto-expanding categories, dynamic count badges, and a Share Pipeline feature for encoded workspace export

TECHNICAL SKILLS

Languages: C/C++, Java, Python, Javascript, Typescript, HTML, CSS

Frameworks: React JS, Next JS, Node, Express JS, FastAPI, Django, Redux, Styled components, Tailwind, Chakra UI

Databases: MongoDB, MySQL, PostgresQL, Firebase firestore, DynamoDB
