Education

University of Birmingham
Master of Engineering, Computer Science & Software Engineering: 1'st Class Honors *Sep. 2023 – Jul 2027*

Experience

Paideia Jan 2026 – June 2026
Software Developer *Dubai, UAE*

- Architected the **database schema** and core data models for the company's **React/Supabase** web platform, enabling analytics across 1000+ student inquiries and applications
- Translated study-abroad consulting workflows into structured data models and reporting-ready **UI dashboards**, cutting manual reporting time by 40% and giving leadership real-time visibility into the application pipeline

MediClinic Sep. 2025 – Dec. 2025
Volunteer Frontend Developer *Dubai (Remote/Hybrid), UAE*

- Built full-featured web application in **React** and **TypeScript** interfacing with **Flask** backend for hospital IR department with patient creation, procedure management, and dynamic checklist attachment system for **15+** clinical checkpoints
- Developed dynamic checklist system for pre-procedural planning, sign-in, and sign-out workflows, reducing manual coordination by **40 hours/week**

GMN AI Agents Oct. 2024 – Feb 2025
Software Engineer Intern *Dubai, UAE*

- Trained NLP model using **TensorFlow** and **BERT embeddings** for resume parsing, achieving **92% accuracy** in skill extraction from unstructured CV data
- Created **50+ test cases** covering CV upload, parsing, and recommendation flows with automated validation scripts, improving parsing accuracy by **15-20%** across **30+ formats**

Projects

Productive | **Microsoft/ASUS Hackathon** | *React, TypeScript, Python, Flask, Azure OpenAI, Microsoft Graph API*

- Placed 2nd among **600+ participants** from **30+ universities** at ASUS Copilot Challenge 2026 building AI-powered student productivity platform
- Engineered deep **Microsoft ecosystem integration** using **OAuth 2.0 with MSAL**, connecting **Teams, Outlook Calendar, To Do, and OneNote**
- Developed **professor dashboard** with course management tools, student engagement tracking, and **AI-powered quiz generation** capabilities

CarboTrack | **Odoo Hackathon** | *Odoo, Python, External APIs, PostgreSQL*

- Won **4th place** among **500+ participants** and gained company recognition from **Odoo** building carbon tracking module in **48-hour sprint** with event-based emissions logging across departments
- Integrated **Electricity Maps API** for emission data and **embedded LLM model** generating AI-powered carbon reduction tips based on usage patterns

ImageLab | **Google Summer of Code 2026 - C2SI** | *React, TypeScript, Python, FastAPI, OpenCV, Blockly*

- Contributing to open-source educational image processing platform as part of **GSoC 2026 application** with C2SI organization
- Implemented **5+ operators** (Gaussian Noise, Salt & Pepper Noise, Sepia Filter, Canny Edge Detection) with full **React/TypeScript** frontend and **FastAPI/OpenCV** backend integration

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, HTML, CSS, SQL
Frameworks & Libraries: React JS, Next JS, Node.js, Express JS, FastAPI, Flask, Django, Redux, Tailwind CSS, Styled Components, TensorFlow
Databases: MongoDB, MySQL, PostgreSQL, Firebase Firestore, DynamoDB, Supabase, SQLite
Tools & Platforms: Git, GitHub, REST APIs, OAuth 2.0, Microsoft Graph API, Azure OpenAI, OpenCV, Odoo, Postman, VS Code
